Five Thoreau Songs

for Soprano and Piano

Ca 18:00'

- I Melting Space
- II Turning of the Mould (with a Spade)
- III Parting Grounds
- IV Somnolence
- V Nest Sounds

Five Thoreau Songs is composed for the occasion of Deborah Valenze's 70th birthday, from her friends at Yellow Barn.

These songs take their texts from the vivid and eloquent prose of American writer Henry David Thoreau, extracted from chapters of his infamous 1854 *Walden*. A root of the American transcendentalism movement, Thoreau chose to remove himself from the certain over-saturation and disconnection he experienced in the larger society and culture and live by his own means in a cabin on Walden pond, outside of Concord, Massachusetts. *Walden* is a catalog of his experiences, reflections and revelations from this time of simple life in defiance. The texts used in these songs do not always come consecutively in Thoreau's writing, but rather are selected passages drawn together to express particular experiences and convictions that prove timeless as we encounter them centuries later.

For Seth Knopp and Elaine Daiber, who I had the pleasure of meeting through the Yellow Barn Music Festival in Putney, Vermont, with heart.

General Notes:

Where the singer should speak as opposed to sing is indicated by different note-heads

spoken, unpitched - refers to voiced speaking, but with no regard for pitch, or voiceless whispering

spoken at pitch - refers to speaking with the intonation of the pitch given

clear voice - as one would sing a folk tune, or as a child sings, with little to no vibrato. The piece asks for this clearer voice in the context of the text highlighting simplicity. This is in contrast to the standard, highly projected classically-trained voice with heavy vibrato.

un poco vib. - invites a small amount of vibrato, especially tastefully on sustained notes, but still engaging with the "clear tone" voice and having a focused, pure sound.

full vibrato - invites heavy vibrato on every note, and the highly projected voice of classical training

I Melting Space 2.5'

What at such a time are histories, chronologies, traditions, and all written revelations?
 The brooks sing carols and glees to the spring. The marsh hawk, sailing low over the meadow, is already seeking the first slimy life that awakes. The sinking sound of melting snow is heard in all dells, and the ice dissolves apace. The grass flames up on the hillside like a spring fire — “et primitus oritur herba imbris primoribus evocata” — as if the earth sent forth an inward heat to greet the returning sun; not yellow but green.

From Chapter XVII: Spring

Note: To be always performed with melodic flow as the deciding factor for phrasing. The rhythm should be free, treated with the same liberty to shape and stretch the phrase as an instrumental cadenza, especially the freedom to ritard at the end of a line, or extend certain notes. Triplet quarter notes can be felt as especially wide, and any rhythm that ties over a beat is an invitation to feel syncopation.

This movement especially features arrow indications, which ask that the singer gradually transition from one voice technique to another across the indicated measures, for example gradually introducing vibrato (m. 6-8 and m. 28-30), or starting with text spoken at pitch and gradually introducing a sung quality (m. 35-37).

Vibrato vs non-vibrato is used along with dynamics to create subito changes, measure 9, 18 and 41 should have the effect of a clearing of texture, within the context of a solo voice piece.

II Turning of the Mould (with a Spade) 4.5'

As I drew a still fresher soil drew a still fresher soil about the rows,
 I disturbed the ashes of unchronicled nations.

Near at hand, upon the topmost spray of a birch, sings the brown thrasher.
 You may wonder what his rigmarole, his amateur Paganini performances,
 have to do with your planting, and yet prefer it to leached ashes or plaster.

Ancient poetry and mythology suggest, at least, that husbandry was once a sacred art;
 but with irreverent haste and heedlessness by us, we have no festival, nor procession, nor ceremony.
 The farmer sacrifices not to Ceres and the Terrestrial Jove, but to the infernal Plutus rather.
 By avarice and selfishness, and a groveling habit, from which none of us is free,
 the landscape is deformed, husbandry is degraded with us, and the farmer leads the meanest of lives.
 He knows Nature but as a robber.

From Chapter VII: The Bean Field

Note: For the pianist, the "Flitting, Jingling" gestures in box notation are meant to be played in both hands, vertical and attacked. These should be angular, birdlike, like cranes folded from sheets of thin metal, hanging from strings on the ceiling and colliding into one another. Rather than treating the rhythms as exact, treat them as grace note gestures, as written-out trills with nuance in their contour and dyad collisions of pitches. The flitting gestures in their highest register should be performed with the pedal down to accumulate a ghostly white noise.

From m. 51 to m. 72, the singer may take liberty in their timing as is suitable to the phrase, especially in their last line at m. 60. The piano, in all its entrances, should be relentlessly in tempo, re-instating the 96 bpm pulse with each entrance, until finally a dramatic *ritardando* into m. 72, the pulse finally deflating.

The music can certainly move into measure 80, but unlike its parallel moment at m. 22, m. 80 should not have any remarkable *accelerando*. Save the *accelerando* for measures 87-94. The *accelerando* into m. 94 is not so extreme as to create a tempo elision -- eighth note triplet is not equal to new sixteenth note triplet -- rather m. 94 should sound like a jump in pace and a burst of energy exploding into the new section.

For the singer, the spoken text at pickup to m. 84 does not have to adhere strictly to the durations indicated, but should be spoken with the rhythms of natural speech as much as possible. As far as tone, this should be quiet but still voiced (as opposed to whispered) and sharply articulated, like a parent telling off a child in a quiet space. Pickup to m. 103 as well should have organic durations, generally more sustained than m. 84, and with the addition of sustained, whispered "s" hiss sounds on certain syllables as indicated. This should be in a voiceless whisper, projected as much as possible, a stage whisper.

At and after m. 116, the singer and piano may take more liberty with the timing, the singer especially, and that liberty can increase as the music moves to the end of the piece, and as rhythmic durations get slower.

III Parting Grounds 3.5'

One generation abandons the enterprises of another like stranded vessels.

I think that we may safely trust a good deal more than we do.

How vigilant we are! determined not to live by faith if we can avoid it; all the day long on the alert, at night we unwillingly say our prayers and commit ourselves to uncertainties. So thoroughly and sincerely are we compelled to live, reverencing our life, and denying the possibility of change. This is the only way, we say; but there are as many ways as there can be drawn radii from one centre.

From Chapter I: Economy

Note: In the beginning, the consistency of the piano half and whole notes should be unyielding, like a great mass slowly moving. Pick-up notes on beats three and four should lead directly into the next measure, and down beats in general should come with utmost insistence on time. The idea of mass should also translate to some amount of warmth and roundness on the lowest notes.

Conversely any breaking away from that constancy should be underscored: The fermatas at m. 32 and m. 41 should be substantial and should temporarily cease the flow of metric time, as should the instances of grace notes preceding a chord.

For the singer, repeated notes in the vocal line mimic chant, and as such the rhythm should be slightly flexible to the delivery of the words. This rhythm should be flexible especially and despite the fact that the piano part is rhythmically rigid.

The middle section, "Driving" should be more impassioned but not faster. The end should be relaxed, yet still with great intention, meditative and even prayerful.

IV Somnolence 4'

There was pasture enough for my imagination.

I did not wish to live what was not life, living is so dear.

In the midst of this chopping sea of civilized life, such are the clouds and storms and quicksands and thousand-and-one items. Still we live meanly, like ants; though the fable tells us that we were long ago changed into men; it is error upon error, and clout upon clout; and our best virtue has for its occasion a superfluous and evitable wretchedness. Our life is frittered away by detail.

Time is but the stream I go a-fishing in. I drink at it; but while I drink I see the sandy bottom and detect how shallow it is. Its thin current slides away, but eternity remains. I would drink deeper; fish in the sky, whose bottom is pebbly with stars.

From Chapter II: Where I Lived and What I Lived For

Note: The pianist at the beginning and end should lean into those notes that have tenuto's, and where tenuto's begin an ascending scale, these notes can be generously drawn out in duration. However, the pianist should not lose touch with a slow, measured pulse. While there can be push and pull within sixteenth-note scales, there should be as if an unspoken impulse and impetus to move forward, revealed finally at m. 14 and gathering speed from there.

The transition into the more relentless motion of m. 14 should come organically from hints of relentless motion before. In general, smoothly transition from one tempo to the next as a matter of accumulated energy or, conversely, increased friction.

At m. 34 to m. 39 the accents should have extra volume above the general forte of the scales, shaped as sforzandi followed by a slight decay.

The singer at m. 30, should deliver the text as a president or minister would deliver a profound and grave speech, with a loud, full-bodied voice, but still controlled, not screaming or nasal. Starting at m. 33, the singer should still be speaking, but at pitch, and then over the course of the next three measures should introduce a sustained sung tone more and more (even in notes with only brief duration) to be back to a full singing voice at m. 36.

V Nest Sounds 3'

As the sparrow had its trill, sitting on the hickory before my door,
so had I my chuckle or suppressed warble which he might hear out of my nest.

The chickadee lisps amid the evergreens, and the partridge and rabbit skulk beneath,
the whip-poor-wills chant* their vespers referring* to the setting of the sun

Late in the evening, the baying of dogs. The lowing of some disconsolate cow

When other birds are still, the screech owls take up the strain. tu-whit tu-who.

The shore rings* with the trump of bullfrogs, the sturdy spirits of ancient wine-bibbers and wassailers,
still unrepentant, trying to sing a catch in their Stygian lake, though their voices have waxed hoarse and
solemnly grave.

From Chapter IV: Sounds

**tenses changed from original text*

Note: For the pianist, the grace notes at the beginning, and after measure 44, “Shadowy”, should come immediately before the beat, with the characteristic of bird chirps and trills. From measure 33 to measure 44, the grace notes should be landed on heavily and should be treated as expansions of the beat, the grace note itself at least a sixteenth note in duration before the full quarter note beat. Tenuto marks in this song are simply to distinguish them from the stark staccato articulations that otherwise occur.

The tempo change from $\text{♩}=90$ to $\text{♩}=100$ at measure 5 should be sudden, similarly at m. 18 and especially at “Suddenly $\text{♩}=90$ ” at m. 23. In contrast, the changes at m. 9, the broadening starting around m. 21, and the transition into m. 33 can all be much more organic and marked by rubato.

For the singer, starting at m. 44 should recall the solo expressive melodic singing of “Melting Space” from the beginning of the cycle, now with sparse piano support.

What at such times are his-to-ries, chron-o-lo-gies, tra-di-tions, and

Detailed description: This is the first system of musical notation for the song 'Mysterious'. It is written for a voice part on a single staff in 4/4 time. The tempo is marked as 'Mysterious' with a quarter note equal to approximately 60 beats per minute. The key signature has one flat (B-flat). The melody begins with a piano (*p*) dynamic and includes a triplet of eighth notes. The lyrics are 'What at such times are his-to-ries, chron-o-lo-gies, tra-di-tions, and'. A performance instruction 'clear voice, no vib.' is placed above the first measure, and 'add vib.' is placed above the final measure, which is followed by a dashed line indicating a continuation.

8 all writ-ten re-ve-la-tions? The brook sings car-ols and glees to the spring. *(p)* *mf*

Detailed description: This is the second system of musical notation for the song 'Spritely, Gayly', starting at measure 8. It is written for a voice part on a single staff in 4/4 time. The tempo is marked as 'Spritely, Gayly' with a quarter note equal to approximately 88 beats per minute. The key signature has one flat. The melody features a crescendo leading to a forte (*f*) dynamic, followed by a subito piano (*sub p*) and then a mezzo-forte (*mf*) section. The lyrics are 'all writ-ten re-ve-la-tions? The brook sings car-ols and glees to the spring.' Performance instructions include 'molto vib.' above measure 8, 'clear voice' above measure 9, and '(clear voice)' above measure 10. A crescendo hairpin is shown above the first measure, and a 'sub' hairpin is shown above the measure where the dynamic changes to *p*.

spoken at pitch, like beginning a story clear voice sung with vib.

Detailed description: This is the third system of musical notation for the song 'Spritely, Gayly', starting at measure 13. It is written for a voice part on a single staff in 4/4 time. The key signature has one flat. The melody continues with dynamics of mezzo-piano (*mp*), mezzo-forte (*mf*), and piano (*p*). The lyrics are 'The marsh hawk, sail-ing low o-ver the mea-dow, is al-rea-dy seek-ing the'. Performance instructions include 'spoken at pitch, like beginning a story' above measure 13, 'clear voice' above measure 14, and 'sung with vib.' above measure 15. A crescendo hairpin is shown above measure 13, and a 'sub' hairpin is shown above measure 14.

first sli-my life that a-wakes. The sink-ing sound of melt-ing snow is heard in all

Detailed description: This is the fourth system of musical notation for the song 'Colder, Delicate', starting at measure 18. It is written for a voice part on a single staff in 4/4 time. The tempo is marked as 'Colder, Delicate' with a quarter note equal to approximately 76 beats per minute. The key signature has one flat. The melody begins with a forte (*f*) dynamic and includes a subito mezzo-piano (*subito mp*) section. The lyrics are 'first sli-my life that a-wakes. The sink-ing sound of melt-ing snow is heard in all'. Performance instructions include 'subito clear voice' above measure 18 and '(clear voice)' above measure 19. A crescendo hairpin is shown above measure 18, and a 'sub' hairpin is shown above measure 19.

Musical score for 'Freely, Slower'. The vocal line (treble clef) starts at measure 44 with a mezzo-piano (mp) dynamic and a 'gentle vib.' instruction. The lyrics are 'This is the on - ly way we say; but there are as man - y ways as there can be'. The piano accompaniment (grand staff) begins with a piano (p) dynamic. The right hand features a series of chords and a long, sustained melodic line in the upper register, marked with a piano-piano (pp) dynamic. The left hand provides a simple harmonic accompaniment. A fermata is placed over the final notes of both staves. Below the piano part, a bracket indicates a 'U.C.' (Una Corda) pedal effect.
